Obey trail signs. Bikes permitted on lower trails only. No motorized vehicles or horses.

Carry in and carry out trash and waste, including pet waste.

Dogs must be leashed or under voice control of the owner. Please pick up after your dogs.

Stick to established trails. No cutting of new trails.

No hunting, trapping, or unauthorized use of firearms due to donor wishes.

Tours, events, and groups of 10+ by permission only.

Volunteers have put in hundreds of hours of work to help care for the trails and habitats at Kirchner Woods and on other **Stowe Land Trust** properties. Join them today! stowelandtrust.org

The Old Sugarhouse

Protected Forever

In 2009, Stowe Land Trust purchased the 79-acre Kirchner Woods from the estate of Gerard J. Kirchner. Jerry was an active land manager who always kept his property open to the public to use. Today, visitors can enjoy three miles of multi-use trails winding through the property.

Stowe Land Trust is a local, member-supported, non-profit 501(c)(3) organization dedicated to the conservation of scenic, recreational, and productive farm and forest lands for the benefit of the greater Stowe community.

STOWE LAND TRUST Kirchner Woods

A Community Natural Area
Owned and Managed by
Stowe Land Trust

Trail Map & Guide

Exploring Kirchner Woods

① **Old Sugarhouse** Visit the heart of Jerry's sugaring operation where his sugarhouse stood and find scattered remains of the buckets and tubing he used to collect sap. This rich hardwood forest is now managed for big maple trees, forest health, and high-quality habitat for songbirds.

Thanks to the help of local volunteers, the site of Jerry's sugarhouse now serves as a picnic area.

② **Sipping Tree** (cover photo) This old sugar maple grew around an abandoned sap bucket making it look like the thirsty tree is trying to take a sip out of the bucket!

③ **Ledges** Enjoy a trek around the Summit Loop where you can see dramatic cliffs and ledges in which porcupines den. The dry, thin soils there are ideal for drought-tolerant oak, hickory, and hophornbeam.

④ **Winter-Use Trails** Winter opens up much more of this property to exploration. Snowshoe or ski along the Rime Line trail to enjoy a unique Red Spruce—Hardwood Forest. Look for big dead trees (called snags) that may be nesting spots for owls or dens for fishers.
